REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
 - As the closest reference on record, combination of Lun (JP 7-18068) and Endo et al (EP 0 420 564 A2) discloses a tape cassette comprising: upper and lower half cases of which a cassette case is composed; a reel with a magnetic tape wound thereon being rotatably stored in the cassette case; a pressure mechanism for pressing elastically the central upper portion of the reel, the pressure mechanism being mounted on the upper half case; a center pin being disposed on one of the reel central upper portion and the pressure mechanism; and a fiat plate portion contacted by the center pin, the flat plate portion being disposed on the other of the reel central upper portion and the pressure mechanism; wherein one of the center pin and the fiat plate portion is molded mainly of polyacetal- system synthetic resin, the other is molded mainly of polybutylene-system or polyethylene-system synthetic resin; **but fails to show** titanium oxide is added to the polybutylene-system or polyethylene-system synthetic resin.
 - Applicant asserts "the object of the invention is to provide a tape cassette which can positively prevent a reel against wear even when it is rotated at a high speed and also can eliminate the generation of sliding resin powder and the vibrations of the reel caused by the wear of the reel" (Specification, p. 4).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
